Technical Visit #1: Liebherr-Aerospace

Liebherr-Aerospace Toulouse SAS - 17 rue Gustave Eiffel, 31140 AUCAMVILLE

Maximum number of participants = 30

Duration of the visit = 1h

LIEBHERR Liebherr-Aerospace Toulouse SAS develops, manufactures, distributes and services air management systems for aircraft.

Liebherr-Aerospace Toulouse SAS is one of the world's leading Tier 1 systems suppliers, supporting its aircraft, helicopter and airline customers in their projects.

Shaping the future...

Everyone must act to make a greener future possible. Liebherr-Aerospace Toulouse SAS has therefore naturally launched numerous initiatives to improve its carbon footprint.

Future technologies are being developed by our teams so that tomorrow's vehicles are cleaner, safer, quieter and more fuel-efficient.

Industry decarbonation objective by 2050 is a key objective for Liebherr-Aerospace Toulouse SAS.

Production lines and test facilities visit :

This two-hour visit includes a tour of the production lines and test facilities.

As far as the production lines are concerned, the tour will focus on :

- Heat exchangers: manufacture of plates and fins, brazing, final assembly of the exchanger.
- Valves: assembly of different types of valve.

The part of the tour devoted to test facilities will show component and system testing, in an environment representative of a commercial aircraft, in the case of air systems.

Technical Visit #2: Airbus - Visit of A350 Final Assembly Line

Airbus Porte A12 Louis Breguet - Avenue Yves Brunaud, 31170 COLOMIERS

Maximum number of participants = 40

Duration of the visit = 1h

AIRBUS You will have the chance to visit the Airbus A350 Final Assembly Line which integrates all the main aircraft components, coming from all around Europe.

You will discover the structural assembly process, as well as the cabin upstreamed activities.

The tour will be guided by top leaders from the A350 operational management team.
